EXPERIENCE

Frontend Developer Intern

DiracAI Private Limited

📅 Jan 2024 – May 2024

- Built reusable UI components using **React.js** and translated Figma designs into responsive layouts.
- Collaborated with the team to deliver features for web-based LMS and self-learning platforms.

Front End Developer

DiracAI Private Limited

📅 June 2024 – Present

- Developed web applications using **React.js**, **Next.js**, and **Angular** for LMS, edtech, and document systems.
- Integrated REST APIs and enhanced UI/UX using **Tailwind CSS** and responsive design practices.

PROJECTS

Real-Time Chat Application

react.js, node.js, socket.io, tailwind css

- Developed a real-time chat app with features like seen, read/unread message status using Socket.io.
- Implemented secure authentication and dynamic user interactions with real-time updates.

DashoApp – LMS Web Application

react.js, firebase

- Contributed to the development of DashoApp – a web-based Learning Management System.
- Implemented modules for course management, user tracking, notifications, and admin features.

Nijje – Self Learning Platform

react.js, firebase

- Worked on the frontend of Nijje, a self-paced learning platform, focusing on clean UI and responsive design.
- Implemented interactive learning components and optimized performance for seamless user experience.

DSpace Document Management System (Govt. Project)

angular, java, xml, dspace 7/9

- Worked on frontend customizations using Angular and contributed to backend logic involving XML configuration and Java.
- Enhanced metadata discovery and integrated search filters for judicial document archives.

EDUCATION

BSc in Computer Science

Model College of Mumbai University

📅 June 2021 – May 2023

CGPA : 7.54

Class X in SSC

RPV School, Dombivali

📅 June 2018

Per : 73.20%

SKILLS

PHP

HTML

CSS

Angular

JavaScript

Git

React

ACHIEVEMENTS

- Hands on Practice for Creating Responsive Webpages within the Design Principles.
- Developed and implemented real-time messaging functionality using Socket.io, enabling instant communication between users.
- Implemented Push Notifications using Firebase Cloud Messaging (FCM) to send real-time alerts to users for new messages and updates in the chat application.

CERTIFICATION

Online Certifications

codecademy

- **Learn JavaScript** – Gained foundational knowledge in JavaScript including variables, functions, loops, DOM manipulation, and ES6 features.
- **Command Line Course** – Learned essential shell commands for navigating, manipulating files/directories, and executing scripts in Unix/Linux environments.
- **Learn Bash Scripting** – Built automation scripts using bash, covering conditionals, loops, variables, and argument parsing.
